## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 11-22 are objected to because of the following informalities: line 1: amend "A method" to -The method--. Appropriate correction is required.

### ***Specification***

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Further, reference numerals should be enclosed in parentheses.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 11-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Art Unit: 3729

There are numerous phrases and clauses in the claims that are vague, indefinite, and/or awkwardly and confusingly worded, and therefore, are not fully understood. The following are examples:

Claim 11, lines 1-2: It is unclear whether "step of forming . . . substance" is a step or steps.

Claim 11, line 3: What is "a basic substance"? Is it water, air, fire, rock, or plastic?

Claim 11, line 3: What is "it" referring to? Is it referring to "a first magnetic layer", "a magnetic pole section" or "a thin film magnetic head"?

Claim 11, line 4: Is "an end edge" referring to "a first insulating layer", "a first magnetic layer", "a magnetic pole section" or "a thin film magnetic head"?

Claims 11 and 18: where is "the magnetic record medium" in reference to the head? "the magnetic record medium" lacks antecedent basis.

Claim 18, lines 4-5: "the above first magnetic layer" lacks positive antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11-22, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Jones, Jr. (US 4,404,609).

Jones discloses a basic substance (13), a plurality of magnetic layers (P1-P3), and all the claimed limitations.
